Profile

A recent Computer Engineering graduate from MIT ADT University with a strong foundation in data analytics, cloud technologies. Proficient in data structures, SQL, Python, and AWS . Demonstrated ability to analyze complex data, develop scalable applications, and communicate insights effectively. Eager to apply technical knowledge and problem-solving skills to real-world challenges in the tech industry.

Also passionate about eSports, trekking, and exploring interdisciplinary fields like science, economics, and spirituality, showcasing a well-rounded and curious mindset.

EDUCATION

B.Tech. – CSE – Big Data and Cloud Engineering,	2021 – 2025
MIT ADT – School of Engineering	Aggregate: 7.24 CGPA

12th, RYK Science College, Nashik	2019 – 2021 74%
10th, St. Francis High School, Nashik(2019)	2019 82%

.PROJECTS

Credit card fraud detection
The primary goal of this project is to develop a machine learning model to detect fraudulent credit card transactions in real-time. Using Azure Machine Learning, the project integrates data preprocessing, model training, deployment, and monitoring on a scalable cloud platform.

Automated S3 Backup System
o automate the creation, configuration, and management of **S3 buckets** for primary storage and backups, with policies that ensure **data durability, security, and cost optimization** — all managed through Terraform.

SKILLS

- SQL
- Python
- Data Structures
- OOPS
- Aws services
- Linux
- Terraform

Certifications

Cloud Computing Applications, Part 1: Cloud Systems and Infrastructure

Python for Data Science, AI & Development

Course

AWS AND DEVOPS

Languages

Hindi
English
Marathi
